MEMO

- direct communication with the receiver
- simple and intuitive operation
- small compact housing

The MEMO service programmer is designed to work with selected DTM System receivers. The programmer allows you to save the receiver's remotes to a file, save remotes to the receiver's memory from a file, configure and add subscribers to the Control GSM receiver and update the receiver's software.

MEMO

service programmer

➤ Basic parameters

power supply: from a USB port or a receiver
 storage capacity: 2 MB
 outer dimensions of the housing: 75x45x15 mm

➤ Communication

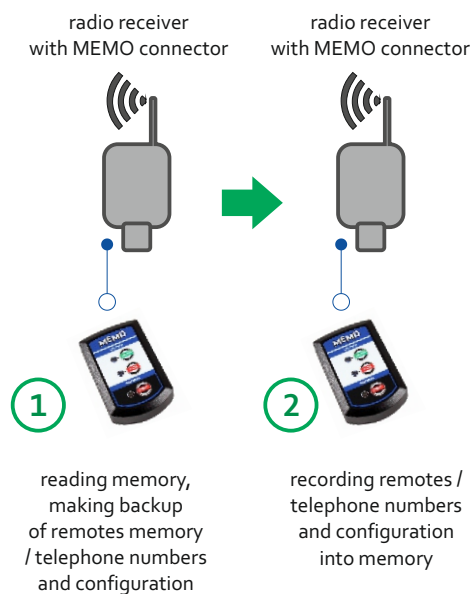

the way of communication
 with the computer and the receiver: via microUSB connector, cable included

➤ Functionality

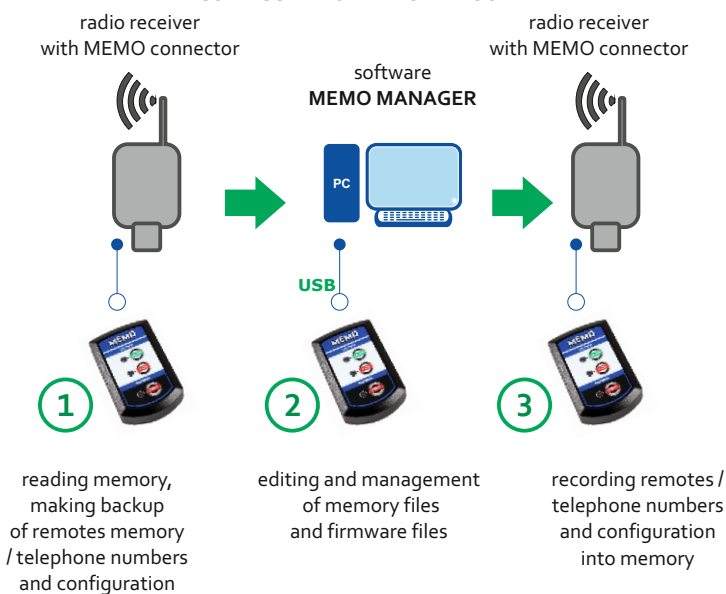

user interface: three buttons and three LEDs
 software: dedicated MEMO MANAGER (MS Windows®) program ensuring compatibility between systems thanks to the support of remote files from various models of radio receivers as well as configuration and adding subscribers to the Control GSM receiver

➤ Principle of operation

TRANSFERRING REMOTES / TELEPHONE NUMBERS AND CONFIGURATIONS BETWEEN RECEIVERS

MANAGEMENT OF REMOTE / TELEPHONE NUMBER AND CONFIGURATION FILES AND SOFTWARE
